We proudly present our 64th Titran's litter born on May 27, 2009

Parents are [EC Wiedzmin Karodok](#) and [EC Karat' Cats Ushuaia JW](#)

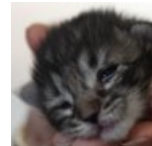

After the tragic death of their mother, none of our queens seemed willing to take care of those two lovely kittens of Ushuaia and so for the first time in almost ten years breeding, I found myself back in the role of a surrogate cat mother.

Seeing the infected intra-uterine environment, the two kittens had been spending quite some time in, the vets and I were not too optimistic about their chances to life but we thought it would be worse trying. And yes, bottle feeding each two hours, cleaning and cuddling worked out fine. They were just perfect: almost 500 grs heavy and so beautiful, sweet and gentle...

At the age of three & a half week, we started dreaming of some nights of uninterrupted sleep and the start of the weaning... but it wasn't meant to be. Due to personal circumstances, I had to let them spent 1.5 days at the veterinarian clinic and the same evening of the day I picked them up there, they started getting fever and despite all our efforts they crossed both the rainbow bridge on Sunday June 22nd, 2009: the day their mother would have turned 6 years old.

Titran's Ushuaia

Female, black tabby mackerel & white n 09 23

Titran's Umberto von Üxküll

Male, black tabby mackerel & white n 09 23
